QPOL 200 M

- | Single wheel grinding- and polishing machine
- | Variable speed
- | Spin cycle feature (Cleaning Boost)
- | Easy, fast and tool-free change of working wheel
- | Easy cleaning/rinsing of bowl by lifting the working wheel (single-disc design)
- | Aluminium case, powder coated
- | Impact-proof plastic bowl
- | Manual water solenoid
- | Basin rinsing tube
- | Incl. splashing ring and cover
- | Start-Stop function with status indication

Qpol 200 M

The Qpol 200 M is a manual single wheel grinder and polisher for working wheels Ø 200 mm.

The strong, speed controlled drive allows application for all working steps.

The shock-resistant plastic basin, powder coated Aluminium housing and high standard of technology inside the unit lend the requisites for quiet and smooth running and optimum preparation results.

ROTARY SWITCH & BOOST FUNCTION

The start/stop button with illuminated status display and the rotary switch with scale and integrated boost button allow for intuitive operation of the manual machines. The set speed remains constant throughout the entire grinding and polishing process. At the end of the preparation procedure, the boost function may be activated to discharge any liquid left on the grinding and polishing medium in 5 seconds at 750 rpm.

SINGLE-DISC DESIGN

After the splash guard ring is removed, the working wheel is freely accessible. Thanks to the innovative mounting system, it locks itself automatically. After lifting it off, all parts underneath are readily accessible for easy and time-saving cleaning of the machine.

TECHNICAL DATA

Qpol 200 M

Application	Manual grinding and polishing of materialographic samples
Fields of application	Preparation of sample surfaces for the materialographic analysis
Number of working wheels	1
Diameter of working wheel	Ø 200 mm
Speed (working wheel)	20 - 600 rpm, continuously adjustable
Drive power (main drive)	0.37 kW (S1 operation)
Connected load	0.7 kVA
Power supply	200-240 V / 50 / 60 Hz (1 Ph / N / PE) 100-120 V / 50 / 60 Hz (1 Ph / N / PE)
W x H x D	401 x 286 x 603 mm
Weight (depends on equipment)	~ 20 - 25 kg
Water connection	1x fresh water connection R½" max. 6 bars
Dosing unit (option)	Qdoser ONE

MANUAL SAMPLE PREPARATION MADE EASY

QPOL 250 M1/M2

- | Single or twin wheel manual grinding & polishing machines
- | Working wheels: Ø 200/250 mm
- | Speed: 30 - 600 rpm, continuously adjustable
- | Spin cycle feature (Cleaning Boost)
- | Working wheel with clockwise/counter-clockwise rotation
- | Easy cleaning/rinsing of bowl by lifting the working wheel (single-disc design)
- | Impact-proof plastic bowl
- | Aluminium case, powder coated
- | Retrofittable automatic grinding/polishing head Qpol GO

Qpol 250 M1

Qpol 250 M2

The Qpol 250 M1 is a manual single wheel grinder & polisher and the Qpol 250 M2 is a manual twin wheel grinder & polisher for working wheels with Ø 200/250 mm.

The start/stop button with illuminated status display as well as the rotary switch with scale and integrated boost button allow for intuitive operation of the manual machines. The set speed remains constant throughout the entire grinding and polishing process.

The particularly powerful, speed-controlled drive makes the machine suitable for all work step and materials. The working wheel can be set to rotate clockwise or counter-clockwise. Thanks to the impact-proof plastic basin, powder-coated aluminium case and sophisticated machine technology, the Qpol M series runs very smoothly and ensures excellent preparation results.

ROBUST PULL-OUT WATER HOSE

The pull-out flexible hose extension allows the tap to be used for cleaning the entire working area and the basin. It can be conveniently operated with one hand.

ERGONOMICALLY SHAPED SPLASH GUARD RING

The ergonomically shaped splash guard ring significantly reduces splashing. It may also be used as a hand rest for longer preparations. The recessed grips allow the grinding and polishing medium to be changed while the ring is still attached. The modified working wheel, the generously designed basin and a loosely fitted splash guard ring ensure a high degree of operator safety.

SINGLE-DISC DESIGN

Thanks to the innovative mounting system, it locks itself automatically. After lifting it off, all parts underneath are readily accessible for easy and time-saving cleaning of the machine.

OPTIONAL GRINDING/POLISHING HEAD QPOL GO

The perfect solution for automated sample preparation. The Qpol 250 M machines can be equipped with the optional Qpol Go grinding/polishing head. Find out more on pages 14-15.

DRY IN THE BLINK OF AN EYE

BOOST FUNCTION

At the end of the preparation procedure, the boost function may be activated to discharge any liquid left on the grinding and polishing medium in 3 seconds at 750 rpm.

OPTIONAL DOSING UNIT QDOSER GO AND QDOSER ONE

The manual grinders and polishers can be combined with the automatic dosing system Qdoser Go or the manual dosing solution Qdoser One, thus offering a high degree of flexibility for sample preparation and ease of use.

Find out more on pages 12-13.

**MANUAL UNITS WITH STRONG DRIVES
AND CONVINCING FEATURES**

QPOL 300 M1/M2

- | Single or twin wheel manual grinding & polishing machines
- | Working wheels: Ø 250/300 mm
- | Speed: 30 - 600 rpm, continuously adjustable
- | Individually controlled working wheels (Qpol 300 M2)
- | Visualization of the current grinding force
- | Timer function
- | Automatic water valve
- | Working wheel with clockwise/counter-clockwise rotation
- | Easy cleaning/rinsing of bowl by lifting the working wheel (single-disc design)
- | Impact-proof plastic bowl
- | Aluminium case, powder coated
- | Retrofittable automatic grinding/polishing head Qpol GO

Qpol 300 M1

Qpol 300 M2

The Qpol 300 M1 is a manual, single wheel, and the Qpol 300 M2 is a manual, twin wheel grinding and polishing machine for working wheels Ø 250/300 mm.

The impact-resistant plastic bowl, the powder-coated aluminium housing and the high-quality components inside the device are the basis for smooth running and best preparation results.

A spin cycle function (Cleaning Boost) helps to spin dry the grinding and polishing medium at 750 rpm at the end of the preparation process within 3 seconds and then turns off the device. The particularly strong, speed-controlled drive makes this model suitable for all preparation steps and materials. In addition, the working disc can be operated in clockwise/counter-clockwise rotation.

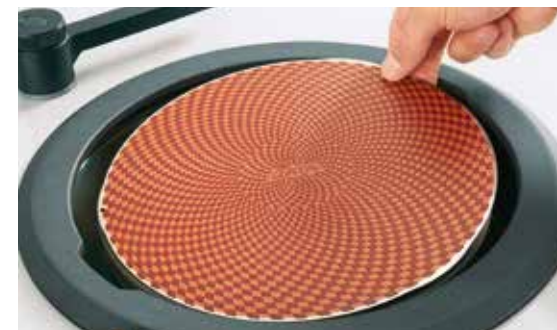

FOR REPRODUCIBLE PREPARATIONS

The time setting and torque display to visualize the current contact pressure are the basis for easy and reproducible manual preparation steps. The water valve is automatically activated at the beginning/end of the preparation process, if required.

INTUITIVE PARAMETER SETTING

The machine is operated and programmed via the 4.3" touch screen. All process parameters can be saved as a preparation method.

ERGONOMICALLY SHAPED SPLASH GUARD RING

The machine design with its new splash guard ring, clearly laid out working area, water tap and sloping control panel convincingly meets all the requirements for comfortable operation. The new mounting system for the working wheel (single disc principle) saves time when changing the grinding and polishing media and cleaning the machine.

OPTIONAL GRINDING/POLISHING HEAD QPOL GO

The perfect solution for automated sample preparation. The Qpol 300 M machines can be equipped with the optional grinding/polishing head Qpol Go. Find out more on pages 14-15.

TOUCH PANEL

EVERYTHING UNDER CONTROL

In the ergonomically integrated touch panel, all process parameters as well as convenient features for manual preparation are clearly displayed and can be easily changed at any time.

OPTIONAL DOSING UNIT QDOSER GO AND QDOSER ONE

The manual grinders and polishers can be combined with the automatic dosing system Qdoser Go or the manual dosing solution Qdoser One, thus offering a high degree of flexibility for sample preparation and ease of use.

Find out more on pages 12-13.

UNIQUE HANDLING

EASY & CONVENIENT DOSING

4 screwable 500 ml glass bottles for 3x diamond suspensions and 1x lubricant or 4x diamond suspension Dia-Complete can be filled through a separate lid. They are quickly removed for easy cleaning.

Qdoser^{GO}
Qdoser^{ONE}

AUTOMATIC DOSING UNIT FOR MANUAL GRINDING & POLISHING MACHINES

QDOSER GO

The Qdoser GO automatic dosing unit may be used in combination with all manual grinders & polishers. The dosing arm with dosing nozzles may be freely positioned on the grinding & polishing machine. The dosing is controlled via the Qdoser GO operating panel. The pre-dosing and backflushing function may also be started manually. After the Qdoser GO has been activated, the liquids are dispensed/dosed automatically during the entire preparation procedure. In combination with other QATM grinders & polishers, the dosing is also started automatically without the need for manual activation.

- | Automatic dosing of
 - 3x diamond suspensions and 1x lubricant or
 - 4x diamond suspension Dia-Complete
- | Dosing intervall adjustable
- | Reverse rinsing function
- | Single or automatic mode
- | For all grinders & polishers
- | Glass bottles for suspensions refillable and removable

DOSING BOTTLE FOR GRINDING & POLISHING MACHINES

QDOSER ONE

The Qdoser ONE dosing system is an easy-to-use solution for manual or semi-automatic polishing processes. QATM's standard suspension and lubricant bottles can be quickly screwed on the dosing attachment. The dosing volume is closely and continuously controlled with an adjusting screw. The system can be mounted to the polishing heads Qpol GO and ECO / ECO+. If used with manual grinding/polishing machines, a stand with suction cups can be placed on the machines.

- | Dosing attachment for standard and suspension bottles
- | Adjustable dosing volume
- | Can be freely positioned with stand
- | Can be screwed to polishing heads Qpol GO and ECO / ECO+

THE BUDGET SOLUTION FOR
AUTOMATED SAMPLE PREPARATION

GRINDING AND POLISHING HEAD QPOL GO

- | Variable single pressure
- | Adjustable timer for preparation time
- | Toolless sample holder clamping
- | Aluminium case, powder coated
- | Retrofittable on Qpol 250/300 M machines
- | Economic LED illumination

The Qpol GO grinding and polishing head enables the perfect introduction to automatic sample preparation and can be combined with the single and twin wheel grinding and polishing machines Qpol 250 M1 / 2 and Qpol 300 M1 / 2.

The grinding/polishing pressure (single pressure) and the preparation time can be continuously adjusted using the corresponding rotary control directly on the grinding and polishing head. The robust device can be combined with a dosing dropper bottle Qdoser ONE that can be screwed onto the polishing head or the Qdoser ECO dosing system and offers maximum flexibility for sample preparation and operating convenience.

ROBUST TECHNOLOGY AND DESIGN

The established technology, simple design and intuitive operating concept ensure simple and rapid preparation steps.

EASY TO USE

The working area of the polishing head is easily accessible and visible thanks to LED illumination and the sleek design.

TECHNICAL DATA

Application	Automatic grinding and polishing of materialographic samples
Fields of application	Preparation of sample surfaces for the materialographic analysis
No. of samples (single pressure)	1 - 4 samples Ø 40 mm
Single pressing force	variable, 5 - 45 N
Speed (head)	150 rpm
Sample holder	Ø 120 mm
Drive power (head)	60 W
Weight (depends on equipment)	18.5 kg

Sample holders are available for all standard diameters up to 40 mm.

**GRINDERS AND POLISHERS WITH ROBUST TECHNOLOGY
AND ELABORATE OPERATIONAL DESIGN**

QPOL 250 A1/A2-ECO QPOL 300 A1/A2-ECO+

- | Single or twin wheel automatic grinding & polishing machines
- | Working wheels: Ø 200/250 mm or Ø 250/300 mm
- | Speed: 30 - 600 rpm, continuously adjustable
- | Individually controlled working wheels (Qpol 300 A2-ECO+)
- | Spin cycle feature (Cleaning Boost)
- | 4.3" Touch-Screen mit intuitiver QATM Benutzersoftware
- | 200 customized programs storable

- | Variable speed of working wheel and polishing head
- | Working wheel and polishing head: clockwise/counter-clockwise rotation
- | Easy cleaning/rinsing of bowl by lifting the working wheel (single-disc design)
- | Impact-proof plastic bowl
- | Aluminium case, powder coated
- | Economic LED illumination

Qpol 250 A1^{ECO}

Qpol 250 A2^{ECO}

Qpol 300 A1^{ECO+}

Qpol 300 A2^{ECO+}

The Qpol 250 A1/A2-ECO are single or twin wheel grinding and polishing machines for the materialographic laboratory, suitable for working wheels Ø 200/250 mm. However, the Qpol 300 A1/A2-ECO+ are suitable for working wheels Ø 250/300 mm.

The machines are conveniently operated by a 4.3" touch screen.

The new holder for the working wheel (single-disc design) enables materialographic sample preparation without carrier disc without compromising performance. The control software allows to edit and save up to 200 preparation methods, protected by a user account management.

The process of the current preparation is visualized by a status bar. It is possible to select an additional acoustic signal at the end of each preparation step in the service menu.

Pressure, speed and direction of rotation (head and working disc) are adjustable. A spin cycle function (Cleaning Boost) helps to spin dry the grinding and polishing medium at 750 rpm at the end of the preparation process within 3 seconds.

PERFECT COMBINATION OF PERFORMANCE AND DESIGN

1 Polishing head ECO / ECO+

- | Two-handed operation for operator safety
- | Grip recesses on both sides for easy swivelling and movement
- | Integrated buttons for unlocking
- | Adjustable swivel limits
- | Automatic water supply
- | Energy-saving LED illumination of the working area
- | Variable speed control for the polishing head
- | Polishing head with clockwise / counter-clockwise rotation
- | Holder for 4x dosing unit Qdoser Eco integrable
- | Qpol 250: For sample holders with Ø 130 mm and up to 6 samples Ø 40 mm
- | Qpol 300: For sample holders with Ø 160 mm and up to 6 samples Ø 50 mm

2 Dosing unit Qdoser ECO

- | Automatic dosing of 3x diamond suspensions and 1x lubricant or 4x diamond suspension Dia-Complete
- | Dosing interval adjustable
- | Reverse rinsing function
- | Controlled by software of grinder & polisher
- | Glass bottles for suspensions refillable and removable
- | Incl. dosing nozzles

3 Control

- | 4.3" Touch screen with intuitive QATM user software
- | 200 customized programs storable
- | Spin cycle feature (Cleaning Boost)
- | USB plug for data transfer and software updates
- | Ethernet plug for online-diagnostics and user support

4 Working wheel

- | working wheels Ø 200/250 mm (Qpol 250) or Ø 250/300 mm (Qpol 300)
- | Single-disc design
- | Variable speed control
- | Clockwise / counter-clockwise rotation
- | Easy, fast and tool-free change of working wheel

5 Basic unit

- | Basin rinsing tube
- | Aluminium case, powder-coated
- | Impact proof plastic bowl
- | Incl. ergonomically shaped splash ring and cover
- | Online operator support

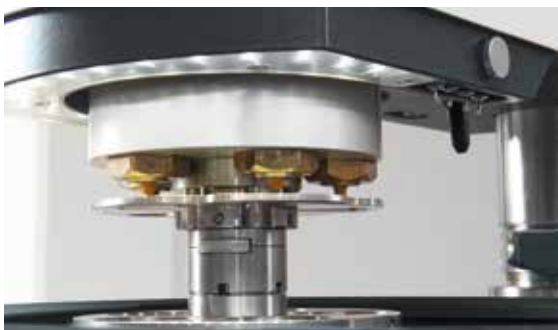

OPERATING CONCEPT

MAKING ALL THE RIGHT MOVES

The machines intuitive operation offers maximum reproducibility for sample preparation and easy of use.

Qpol 250 A1 ECU

Qdoser ECU

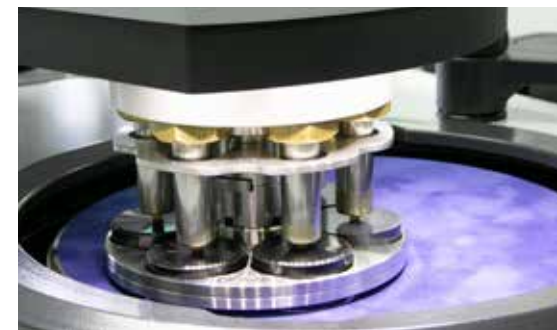

POLISHING HEAD

The polishing head is equipped with LED illumination of the working area and a holder for the nozzles of the Qdoser ECO / ECO+ dosing system. Water is supplied automatically via the head.

OPERATING COMFORT

The grinding & polishing head with adjustable swivelling limits is equipped with recessed grips on both sides and integrated buttons for easy swivelling and adjustment. A large gap between the working surface and the polishing head ensures convenient changing of the sample holder.

VARIABLE SPEED

The grinding & polishing head exerts 5 - 80 N in single pressure and 20 - 350 N in central pressure mode. For Qpol 250 up to 6 samples Ø 40 mm can be moved at variable speed with sample holders Ø 130 mm. For Qpol 300 sample holders with Ø 160 mm for up to 6 samples Ø 50 mm are available.

ELECTRONIC CONTROL SYSTEM

The machine is operated and programmed via the 4.3" touch screen. Preparation methods for sample preparation may be edited and saved. It is also possible to prepare samples manually.

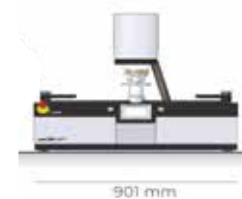

OPTIONAL DOSING UNIT QDOSER ECO / ECO+ AND QDOSER ONE

The automatic grinders and polishers can be combined with the fully automatic dosing system Qdoser ECO / ECO+ or the manual dosing solution Qdoser One, thus offering a high degree of flexibility for sample preparation and ease of use. Find out more on page 21.

SAMPLE HOLDERS

QATM offers a wide selection of standard sample holders in various diameters and for different applications and machines. Samples with unusual dimensions can be clamped with the help of special design sample holders.

FULLY AUTOMATIC DOSING UNITS FOR AUTOMATIC GRINDING & POLISHING MACHINES

QDOSER ECO / ECO+

The Qdoser ECO and Qdoser ECO+ fully automatic dosing units speed up grinding and polishing processes in the materialographic laboratory and are designed for use with the automatic grinding machines of the Qpol 250/300 A series.

4 screwable 500 ml glass bottles can hold diamond suspensions, lubricant or final polishing suspensions and can be filled through a separate lid, even during operation. They are quickly removed for easy cleaning.

A backflushing function keeps the hoses clean..

- I Fully automatic dosing of
 - 3x diamond suspensions and 1x lubricant or
 - 4x diamond suspension Dia-Complete
 - ECO+: additionally also 3x Dia-Complete and 1x final polishing suspension can be dosed
 - ECO+: extension for final polishing suspension to 1 L-suspension supply bottle available
- I Dosing intervall adjustable
- I Reverse rinsing function
- I Controlled by software of Qpol 250/300 A grinders & polishers
- I For grinders & polishers Qpol 250/300 A series
- I Glass bottles for suspensions refillable and removable

DOSING

The dosing nozzles are easily attached to the grinding and polishing head. The dosing is controlled fully automatically by the software of the Qpol devices.

MAGNETIC STIRRER (OPTIONAL)

The magnetic stirrer integrated in the control unit of the Qpol 250/300 A series prevents the suspension from settling. The automatic stirring of the suspensions ensures a good preparation result due to the optimal distribution of the polishing particles before use.

VERDER scientific

VERDER SCIENTIFIC

SCIENCE FOR SOLIDS

Verder Scientific is a business field belonging to the Verder Group and sets standards in the development, manufacture and sale of laboratory and analytics devices. Used in quality control, research and development for test-piece preparation and the analysis of solids.

For several decades our companies have supplied production plants and research institutes, laboratories for quality testing and analytics, all kinds of technical specialists and scientists with modern, reliable devices to solve the many and varied challenges they face.
